PROFILE

Results-driven Fullstack Software Engineer with proven track record building robust and scalable web application, specializing in both frontend and backend development. Demonstrated expertise in performance optimization and code refactoring, resulting in improved user experience and engagement. Proven ability to collaborate effectively and deliver high-quality solutions that contribute to project success.

STRENGTHS

- Frontend and Backend Development
- Agile Methodologies
- Web Security Practices
- SQL & Database Management
- Creative Problem Solving Techniques
- Team Collaboration Skills
- Software Quality Assurance
- User Experience Enhancement
- Responsive Web Design
- CI/CD
- Version Control Systems
- API design and integration, RESTful Services
- Attention to detail
- Data Analytics Integration
- Performance Optimization
- Code Review and Helping Colleagues

EXPERIENCE

06/2022 - Current

Fullstack Software Engineer, ERNI Philippines

- Facilitated deployment processes for both Frontend and Backend systems to ensure efficiency.
- Executed coding of feature updates per design specifications, enhancing functionality.
- Conducted code reviews and supported other developers in resolving complex issues.
- Integrated Zoom meeting functionality for live streaming events, improving user interaction.
- Created H5 games using Construct3, significantly boosting user engagement.

- Addressed bugs across web applications promptly to maintain seamless operation.
- Utilized MoEngage for streamlined data analytics integration, enhancing insights.
- Refactored frontend and backend to optimize performance according to SOLID principles.
- Utilized Jest and React Testing Library for Unit Tests.

12/2021 - 05/2022

Fullstack Software Engineer, Dynamics Strategic Solutions

- Developed new features and maintained applications for both web-based and H5.
- Resolved complex application bugs to enhance user experience.
- Utilized ReactJS, SCSS, Redux and GSAP for Frontend Development.
- Utilized NodeJS, TypeORM and MySQL for Backend Development.
- Utilized Jest and React Testing Library for Unit Tests.

01/2020 - 11/2021

Fullstack Software Engineer, Freelance

- Developed and deployed mobile applications alongside responsive websites utilizing ReactJS, React Expo, Material UI, Redux Toolkit for Frontend Development.
- Utilized Strapi CMS, NodeJS, TypeORM and MySQL for Backend Development.
- Executed thorough testing procedures ensuring optimal performance across all platforms using JEST, React Testing Library, and other testing libraries.

EDUCATION

Bachelor of Science, Computer Science

University of Perpetual Help System Dalta

College

Las Piñas East National High School

High School

Dona Manuela & Bacoor Elementary School

Grade School
